Art Unit: 2622

1. All pending claims 1-13 are allowed. Claims 1, 7 and 11 are independent.

2. The following is an examiner's statement of reasons for allowance:

Claims 1, 7 and 11 are allowable over the prior art of record.

The closest prior art references Akuzawa et al. (U.S. Patent No. 5,453,850) and Nosaki et al. (U.S. Patent No. 5,107,344), cited below, disclose having the home position of the image reading carriage or a first carriage having a light source and a reflecting mirror right below the white reference plate (WP in Fig. 2 of Akuzawa et al. and 21 in Fig. 1 of Nosaki et al.). However, neither Akuzawa et al. nor Nosaki et al. teaches a driving unit for moving the carriage in a specific manner claimed, i.e., a manner such that, at the wait time, the reflected light from the white reference provider (white reference plate) is guided to the mirror supported on the carriage, in combination with the features of the home position sensor for detecting a marker member mounted on the carriage, and in combination with other limitations of **claim 1**.

Claim 7 recites limitations similar to those of claim 1. The driving unit moves the carriage at the wait time in a manner similar to that of claim 1.

Claim 11 is method claim corresponding to claim 7. Claim 7 claims moving the carriage at the wait time in the manner similar to that of claim 7.

Claims 2-6 depend upon claim 1. Claims 8-10 depend upon claim 7. Claims 12 and 13 depend upon claim 11.

Please note that none of the other prior art references cited below disclose the specific manner the carriage is driven or moved as claimed in claims 1, 7 or 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Akuzawa et al. (U.S. Patent No. 5,453,850) discloses having the home position of the image reading carriage or a first carriage having a light source and a reflecting mirror located right below the white reference plate (WP in Fig. 2 of Akuzawa et al.) at wait time.

Nosaki et al. (U.S. Patent No. 5,107,344) discloses having the home position of the image reading carriage or a first carriage having a light source and a reflecting mirror located right below the white reference plate (21 in Fig. 1 of Nosaki et al.) at wait time.

Asakawa (U.S. Patent No. 6,606,464) discloses a method and apparatus for image reading and image forming, with shading operation control for increased throughput (Fig. 1, col. 8, lines 28-40).

Sone (U.S. Patent No. 6,650,854) discloses an image reading apparatus that holds the carriage at the reading position in the document-feed mode (Figs. 1 and 5).

Takeuchi (U.S. Patent No. 5,978,614) discloses an image scanning apparatus with light source condition testing (Figs. 1 and 2).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cheukfan Lee whose telephone number is (703) 305-4867. The examiner can normally be reached on 9:30 a.m. to 6:00 p.m., Mon-Fri.
